

AGREEMENT FOR COATING NON-STEWARD OBSERVATORY OPTICS

A. As a duly authorized representative of Smithsonian Astrophysical Observatory I will deliver to SO the following item(s) for coating as specified, and will pick them up upon completion when notified:

Whipple Observatory 1.5m telescope primary and secondary mirrors

- B. All optical film specifications will be supplied by the authorized representative.
- C. Attached are drawings showing all pertinent dimensions, weights, and materials of these items, if needed
- D. Unless otherwise agreed upon by SO, any special handling fixtures needed will be furnished to SO no later than the time the items to be coated are delivered to SO.
- E. We understand that the estimated dates for coating (August, 2014) are not firm and are subject to some adjustment, but that SO will make its best effort to meet those dates.
- F. SO will not have liability for any breakage or other damage to the items to be coated and related equipment associated with this job. It is understood that SO will exercise all reasonable care to prevent such breakage. The customer has the option of insuring the items against damage that may occur during the coating process.
- G. This work is to be undertaken on a cost-reimbursement basis. We understand that the estimate furnished by SO is based on labor and materials for a single attempt at coating, and if this fails for any reason we (the customer) must bear the additional costs associated with any successive attempts.
